SUBJECT: Silicon Wafer Requires No MSDS

To Whom It May Concern:

Thank you for your recent request for a Material Safety Data Sheet for SUMCO's Silicon Wafers.

The purpose of this letter is to advise you that Silicon Wafers do not require a Material Safety Data Sheet because they meet the OSHA definition of an "article" found at 29CFR section 1910.1200(c). They are formed to a specific end use dependent on their shape, and under normal use conditions they release no hazardous chemicals nor pose a physical hazard or health risk.

Regards,

Greg Hedger
Asst. Director, Environmental Health and Safety
SUMCO USA
